## Electronic door handle with access control SecureEntry-HL200

**SecureEntry-HL200 is a smart electronic door handle with access control.** It protects against unauthorized access and offers unlocking by **Password, RFID card, fingerprint TUYA application.** Made of high quality Aluminum alloy protect against damage.

# Electronic door handle with access control

## SecureEntry-HL200

<b>Model</b>	SecureEntry-HL200	<b>Operating voltage</b>	6V
<b>Material of construction</b>	Aluminium alloy	<b>Initial current</b>	≤ 50μA
<b>Type of device</b>	electronic handle with lock and access control	<b>Dynamic current</b>	≤ 180mA
<b>Types of verification</b>	Password, fingerprint, RFID card, TUYA app, key	<b>Response time</b>	≤ 0.1 seconds
<b>Lock body</b>	two tongues or single latch	<b>Unlocking time</b>	≤ 1 second
<b>Fingerprint recognition</b>	solid-state FPC	<b>Emergency power supply</b>	5VDC
<b>Number of administrators in base</b>	9	<b>The right type of door</b>	stainless steel / anti-burglary / copper / wooden
<b>Capacity of users in the base</b>	300 (fingerprint, password, card)	<b>The right door thickness</b>	35-50 mm
<b>Voice messages</b>	yes	<b>Usage</b>	house, apartment, modern office, campus, dormitory
<b>Keyboard</b>	standard 12-bit touch keyboard	<b>Lock size</b>	250*60*28 mm
<b>Fingerprint identification angle</b>	360°	<b>Operating temperature</b>	-24°C ~60°C
<b>Error rejection rate</b>	≤ 0,1%	<b>Operating humidity</b>	20 ~90%
<b>Rate of false diagnoses</b>	≤ 0,0001%		
<b>Password length</b>	4-8 digits		
<b>Additional features</b>	Sabotage alarm, touch keypad, cooperation with TUYA application
